## Exercise

• Let Q(x) be the statement "x + 1 > 2x" If the domain consists of all integers, what are these truth values?

- 1. Q(0) true
- 2. Q(-1) true
- 3.  $\exists x Q(x)$  true
- 4.  $\forall x Q(x)$  false
- 5.  $\exists x \neg Q(x)$  true
- 6.  $\forall x \neg Q(x)$  false

## Exercise

• Let Q(x,y) be the statement "x + y = x - y" If the domain consists of all integers, what are these truth values?

- 1. Q(1,1) false
- 2.  $\forall$ y Q(1,y) false
- 3.  $\exists x Q(x,2)$  false
- 4.  $\exists x \exists y Q(x,y)$  true
- 5.  $\forall x \exists y Q(x,y)$  true
- 6.  $\forall y \exists x Q(x,y)$  false

## Exercise

- Let statement S(x,y) = "x is a student in y university". Express the following statements:
  - 1. "All people are students in King Saud University".
    - $\forall x S(x,"KSU")$
  - 2. "Every university in the world has students".
    - ∀y∃x S(x,y)
